PROJECTS

- **E-Commerce Website**
  Developed an ecommerce web-app for Chintamani Bakery, Bathinda. This helped their customers browse and order items online. This also helped Chintamani Bakery grow their business online and gave them a better web presence.

  - ➢ Tech Stack: PHP as a server side scripting language, mysql as a database and HTML, CSS, JavaScript for frontend.
  - ➢ Github Link : https://github.com/Vimmey/Chintamani-Bakery
  - ➢ Project live at https://vimmey.com/chintamani

- **SecureMT**

   As a learning project, developed a web-app for secure money transfer between registered user. Used cryptographic algorithms and techniques to secure the website/transactions. Exposed REST API's to make transaction, to get transaction details, to get account balance, etc over a secure HTTPS connection.

   ➢ Tech Stack: Build using LAMP Stack with MVC design.
   ➢ Github Link : https://github.com/Vimmey/SecureMT
   ➢ Project live at https://vimmey.com/securemt

- **RapidAVD**

   Developed a platform to download audio/video from any supported multimedia URL. Audio from a Video URL can also be extracted. Exposed REST API's to getAudio and to getVideo. Valid authorization token is required to access features through the APIs

   ➢ Tech Stack: LAMP Stack with MVC design, NodeJs for background services.
   ➢ Github Link : https://github.com/Vimmey/rapidAVD
   ➢ Project live at https://vimmey.com/rapidavd

INDEPENDENT COURSEWORK / TRAININGS

Year	Course
